Heart, Cancer Lead

Heart disease and cancer stayed far in the lead as killers in Greater Victoria in 1958.

Annual report of the Victoria-Esquimalt health department showed:

Non-traffic accidents, pneumonia and cancer, in that order, caused most deaths in the one-to-19 age group.

Cancer, non-traffic accidents and traffic accidents, in that order, caused the most deaths in the 20-39 group.

Cancer, heart disease and suicide were the chief causes in the 40-49 group.

Heart disease, cancer and stroke were the chief causes in the 50-59 group, and also in the 60-69 group.

The same three were the chief causes of death in the 70-and-up group, except that strokes took second place: heart disease killed 466, strokes 196, and cancer 158.

MEDICAL TRADITION

Austria, which draws medical students from all over the world, has more doctors per capita than most other countries.

Plane Hits Highway Sign But Two Aboard Unhurt

HOPE (CP)—A small private plane was demolished when it struck a traffic sign as it made an emergency landing on the Hope-Princeton highway. The two men aboard were not injured.

Pilot Tom Milburn and passenger Richard Vogt, both of Vancouver, were on a flight from Penticton to Vancouver when a sudden cloudburst cut visability over the mountainous Hope area.

Milburn estimated damage at about $10,000.
